DISPATCH NO. 58- 709

25X1

SECRET
CLASSIFICATION

TO : Chief, KUCLUB

DATE 10 April 1958

FROM : Chief, *GRH*

25X1

SUBJECT: General—Engineering
Specific—TA-1 Drawings

REF: A. ENG 58-293
B. 58-452

25X1

1. Thanks for your prompt reply to reference B.
2. Please recheck Dwg. No. 5; Assembly, Key. It appears that the length of the key arm support of Part 6, as shown in the lower view, is twice that shown in the upper view and in the detail drawing. Also, the spring seat was omitted from Part 7 in the upper view.
3. May we also suggest that the spelling of miniature and variable be corrected where needed? See Bill of Material, line 21 and Dwg. No. 21.
4. The Bill of Material, in line 84, seems to duplicate line 21 but with an incorrect reference. -
5. Our copies of Dwg. No. 5 were corrected in order to avoid delay in procurement, but it is embarrassing to have to present a poor set of drawings to the Signal Procurement Office for transmittal .
6. There is ambiguity in the desired capacity of the miniature variable condenser, *CB* Part No. 21. The drawing shows 365 μ f, and the Parts List, 10-500 μ f. Is it possible to obtain such a low minimum with a maximum of the order of 365/500 μ f? What should the indicated range be?
